

## SfC and Political Parties

As approved by SfC 2014 Autumn Conference (2/11/14) in Edinburgh.

SfC believes that the most effective and important way of in acting its values, aims and principles is through bottom up organisation and action on the part of students and other communities. As such its primary focus is the facilitation and support through collective action of students via co-ops and not political parties. SfC is however willing to collaborate with political parties on particular issues directly relating to its values, aims and principles, when the view among the membership is that it will be an effective use of our time, which will not always be the case.
